Re: West Nile virus screening 2010

PLEASE POST OR DISTRIBUTE AS WIDELY AS APPROPRIATE

West Nile virus diagnostic testing 2010 commences June 1, 2010

West Nile virus (WNV) screening is available routinely from June 1 – October 30 for organ and tissue donors (outside this time period, testing is available only for those with a relevant travel history). WNV testing will proceed in 2010 as in previous years, using nucleic acid amplification tests (NATs) undertaken locally (by NASBA/PCR for organ donors) or by referral to Mount Sinai Hospital (Health Canada approved TMA assay for eye and tissue donors). In the case of testing referred out to Mount Sinai, ProvLab will retain residual sample locally for any necessary follow up testing. Please ensure sufficient sample volume is submitted for all necessary NAT screening (EDTA blood) as well as other screening (serum separator tubes).

For further advice and consultation please contact the Virologist (VOC) -on-call:

Edmonton Site – Ph: 780-407-8822 (UAH Switchboard) or
780-407-7121 (Laboratory) (ask for VOC)

Calgary Site – Ph: 403-944-1200 (ask for VOC)
